THEOLOGICAL SEMINARY

THE WORCESTER
COLLECTION of Sacred Harmony.
FIRST and SECOND PARTS.

CONTAINING,

- I. An INTRODUCTION to the GROUNDS of MUSICK: Or, RULES for LEARNERS.
II. A large Number of celebrated PSALM and HYMN TUNES, from the most approved Authors. Suited to all Metres usually sung in Churches.

To which is added,

An APPENDIX.

Containing a Number of excellent PSALM TUNES, (several of which are entirely NEW) and other PIECES of SACRED VOCAL MUSICK, many of which were composed by eminent European Authors, and never before published in this country.

WHOLE compiled for the Use of SCHOOLS and SINGING SOCIETIES.

PRAISE ye the LORD: For it is good to SING Praises unto our God. — PSALM CXLVII.

THE FOURTH EDITION, WITH ADDITIONS.

PRINTED, Typographically, at BOSTON,

BY ISAAH THOMAS AND EBENEZER T. ANDREWS.

Sold by them at FAUST'S STATUE, No. 45, Newbury Street; and by said THOMAS in WORCESTER. Sold also by the Booksellers in Town and Country.

MDCCCXII.

P R E F A C E, to the F O U R T H Edition.

THE encouragement given to this work, has rendered it necessary for the Editor to publish a Fourth Edition sooner than he expected.

He has been careful to make every new Edition of this book, superiour to that which preceded it, and he flatters himself that this fourth Edition, will, on examination, have a preference to every former one.—Several Tunes, not in high estimation, are omitted, and a number of new ones, and others, much celebrated by good judges, are introduced in the room of those omitted.

A Third Part to this work is preparing for publication.—As soon as the Collection is completed, it will be put to the Press. The contents of it will be Anthems, and favourite pieces of Musick—many of the pieces will be new, and others the compositions of the best Musicians in Europe and America.

The Lovers of Sacred Harmony may rest assured, that all times every attention will be paid to make this Collection truly useful and pleasing, and any approved Musick that may be presented for insertion, or any hints for the improvement of the work, will be thankfully received by their's and the publick's very humble servant,

ISAIAH THOMAS.

Worcester, December, 1792.

TO THE

Several **Musical Societies,**

In the *New England* States,

THIS

TYPOGRAPHICAL IMPRESSION

OF

SACRED HARMONY,

IS HUMBLY DEDICATED,

BY THEIR OBEDIENT SERVANT,

The EDITOR.

On Musick.

DOWN steers the *Bass* with grave majestic air,
And up the *Treble* mounts with shrill career
With softer sounds, in mild melodious maze,
Warbling between, the *Tenor* gently plays :
But if th' aspiring *Altus* join its force,
See ! like the lark, it wings its tow'ring course ;
Then rolls the rapture thro' the air around,
In the full magick melody of sound.

'TIS thine, sweet Power, to raise the thought sublime,
Quell each rude passion, and the heart refine ;
Soft are thy strains as Gabriel's gentlest string,
Calm as the breathing zephyrs of the spring.

Worcester Collection of SACRED HARMONY.

P A R T I.

An INTRODUCTION to the GROUNDS of MUSICK ; and RULES for LEARNERS.

Of the SCALE of MUSICAL NOTES, commonly called the GAMUT.

MUSICK is written on five lines, which, including the spaces between them, and immediately above and below them, are called by Musicians, a *stave*, and are thus placed,

It often happens that notes of musick ascend above, or descend below, these five lines, and then another line is occasionally added, and is called the *Ledger Line*. Notes on the upper ledger line, are called notes in *Alt*, and those on the lower ledger line, are called *Doubles*. These lines and spaces are represented by the first seven letters of the alphabet, which are placed on the stave, according to the part of musick

musick for which it is designed. The parts of church musick are commonly four, viz. *Treble*, *Counter*, *Tenor*, and *Bass*. The letters are placed on the *Treble* and *Tenor* stave in the following order,

	G	Sol.
	F	Fa.
	E	La.
	D	Sol.
	C	Fa.
<i>Treble and Tenor.</i>	B	Me.
	A	La.
	G	Sol.
	F	Fa.
	E	La.
	D	Sol.

Every part of musick has, placed at the beginning of the stave, what is called a *Cliff*, or a musical character which shews what part of the musick is on that stave—whether *Treble*, *Tenor*, *Counter*, or *Bass*.

The *Treble*, and *Tenor* cliff is the same. It is always placed on G, the lower line but one, in the *Treble* and *Tenor* stave, and is therefore called the *G Cliff*, and is thus marked,

In *Counter* the letters on the stave are thus placed,

	A	La.
	G	Sol.
	F	Fa.
	E	La.
	D	Sol.
<i>Counter.</i>	C	Fa.
	B	Me.
	A	La.
	G	Sol.
	F	Fa.
	E	La.

The *Counter* cliff thus marked, , is called the *C Cliff*, being always placed on

that letter, which is the middle line of the *Counter* stave, and is now used only for this part of musick.

In *Bass* the seven-letters are thus placed on the stave, viz.

	B	Me.
	A	La.
	G	Sol.
	F	Fa.
	E	La.
<i>Bass.</i>	D	Sol.
	C	Fa.
	B	Me.
	A	La.
	G	Sol.
	F	Fa.

The third and last cliff is the *F Cliff*, used only in *Bass*, and always placed on F,

the upper line but one in the *Bass* stave, and is thus marked,

If either of the cliffs be moved to another line or space, the letters in the order before placed, must all move with it; but in modern compositions of musick, this seldom or ever happens.

Although there are more than seven places on the staff to be named by letters, yet there are but seven letters used, every eighth being the same repeated, and they always keep the same order; wherever G is found, the next letter above is A, the next B, and so on, always reckoning both lines and spaces.

All notes of musick which represent sounds, are called, in sounding of them, by four names only, viz. *Me, fâ, fâl, là*.* *Me*, is the leading note, and when that is found, the notes on the lines and spaces above are called *fâ, fâl, là, fâ, fâl, là*; and those below *me, là, fâl, fâ, là, fâl, fâ*; after which *me* will come again; as in the following example of the *Treble*, or *Tenor*,

In *Counter* and *Bass*, after finding *me*, the other notes are named in the same order.

There are said to be but *seven* natural sounds, every eighth sound being the same, and is called an *Octave*; therefore these sounds are represented by only *seven* letters. The sounds are called in musick *Tones*, five of them are called whole tones, and two of them semitones (or half notes.) The semitones are between B and C, and between E and F, as marked in the foregoing example.

Although this is the natural situation of the semitones, yet their places on the staves, are very often altered by flats and sharps; therefore observe, that

The

* Be careful to speak the notes plain. *Me* is commonly wrote *mi*, but I have called it *me* through the whole of this Introduction, as it is so sounded. Sound *fâ*, as in *fâther*; *là*, as in *làrb*; and *fâl*, as in *fâldier*.

I would here beg leave to observe, that the reason and origin of using figures at the beginning of the staff to denote the time, seems to be almost lost, and they are called three to two, or three from two, 3 to 4—3 from 8, &c. without seeming any thing more than arbitrary characters, to denote a quicker or slower time. I think it may be of some use to explain this matter.

At first the notes, instead of the names of *semibreve, minim, crotchet*, &c. were called by the names of *numbers*, denoting their relative quantities or lengths. Thus a *semibreve* being called one, a *minim* was called 2, a *crotchet* 4, a *quaver* 8, *semiquaver* 16, &c. And $\frac{3}{2}$, means three minims in a bar; $\frac{3}{4}$, three crotchets; $\frac{3}{8}$, three quavers; $\frac{6}{8}$, six crotchets; $\frac{6}{16}$, six quavers in a bar;—and in common time, $\frac{2}{4}$, means two crotchets: And so of several other times which are now little used; as, $\frac{3}{16}$, $\frac{6}{16}$, $\frac{9}{16}$, $\frac{12}{16}$, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{1}{2}$, the upper figure denoting the number of notes in a bar, and the lower figure, the name, or what kind of notes they are. (For the various Moods of Time, see page eight)

The *natural* place for *me*, is, in all parts of musick, on that line or space of the stave which is called B:

But if B be flat, $\flat$ <i>me</i> is in	E	If F be sharp $\sharp$ <i>me</i> is in	F
B $\flat$ and E $\flat$ it is in	A	F $\sharp$ and C $\sharp$ it is in	C
B $\flat$ E $\flat$ and A $\flat$ it is in	D	F $\sharp$ C and G $\sharp$ it is in	G
B $\flat$ E $\flat$ A $\flat$ and D $\flat$ it is in	G	F $\sharp$ C $\sharp$ G $\sharp$ and D $\sharp$ it is in	D

As in the following example, *viz.*

Me in its Natural $\natural$ Place.	Me, transposed by Flats.				Me, transposed by Sharps.			
	B $\flat$ flat, Me in E.	B & E flat Me in A.	B, E & A flat Me in D.	B, E, A and D flat, Me in G.	F sharp $\sharp$ Me in F.	F & C sharp Me in C.	F, C & G sharp Me in G.	F, C, G and D sharp, Me in D.
Tenor, or Treble.								
Counter.								
Bass.								

When B is flatted it makes a *whole* tone between B and C, and leaves only *half* a tone between E and F, consequently but *half* a tone between F and G. The reason of this is the alteration of *me*; for, find *me* where you will, the notes *above*, are called as before observed, *fà, sol, là, &c.* and *below*, *là, fèl, fà, &c.* and the two semitones are always found between *me* and *fà*, and *là*, and *fà*.

A distinction should always be made between the sounds of B-*me* and C-*fà*: Many are apt to strike B-*me* as high as C-*fà* in sharp keyed tunes, which injures the composition.

The NAMES and MEASURES of the NOTES used in MUSICK, with their RESTS.

NOTES. RESTS.					

The following SCALE will shew at one View the *Proportion* one Note bears to another.

1 - - - - - *Semibreve* - Contains

2 - - - - - *Minims.*

4 - - - - - *Crotchets.*

8 - - - - - *Quavers.*

16 - - - - - *Semiquavers.*

32 - - - - - *Demifemiquavers.*

EXPLANATION of the SCALES.

THESE Scales comprehend the six musical notes, with their rests, and the proportion they bear to each other.

1. The *Semibreve*,  is now the longest note used in musick, though anciently it  was the shortest. It is the measure note, and guideth all others.

2. The *Minim*,  is but half the length of the semibreve, and has a tail to it.

3. The *Crotchet*,  is but half the length of the minim, and has a black head.

4. The *Quaver*,  is but half the length of the crotchet, having one turn to its tail, which is crooked, sometimes one way, and sometimes another, as thus, 

5. The *Semiquaver*,  is half the length of the quaver, having two turns to its tail, which turns are crooked as variously as that of the quaver.

6. The

6. The *Demisemiquaver*,  is half the length of the semiquaver, and has three turns to its tail, crooked like those of the semiquaver.

These notes are sounded sometimes quicker, and sometimes slower, according to the several moods of time hereafter to be explained ; the notes of themselves always bear the same proportion to each other, whatever the time may be.

All *Rests*  are notes of silence, which signify that you must rest, or keep silent, so long time

as it takes to sound the notes they represent : Excepting the *Semibreve Rest*, which is called the *Bar Rest*, always filling a bar, let the mood of time be what it may.

Rests also help to fill bars at the beginning and end of tunes.

Besides these rests there are others, made use of in instrumental musick, which are as follow,

Of other CHARACTERS used in MUSICK, and their USES.

1.	2.	3.	4.	5.	6.	7.	8.	9.	10.	11.	12.	13.	14.

Point of Addition | *Point of Diminution* | *Flat.* | *Sharp.* | *Natural.* | *Slur.* | *Dirigible.* | *Bar.* | *Double Bar.* | *Repeat.* | *Shake, or Trill.* | *Double Ending.* | *Notes of Distinction.* | *Close.*

1. **T**HE *Point of Addition* set at the right hand of any note, adds to the time of that note *half* as much as it was before. When this point is set to a semibreve, it is as long as three minims, &c. as for example,

2. A *Figure of 3*, or *Diminution*, set over or under any *three* notes, shews that they must be reduced to the time of *two* notes of the same kind, as for example,

which shews that when this figure is set over *three* crotchets, they must be sung in the time of *one* minim, and *three* quavers with this figure, in the time of *one* crotchet.

3. A Flat ♭ is a mark of *Depression*, and causeth any note before which it is placed to be sounded *half a tone lower* than if the flat was not there; and when a flat is set at the beginning of a staff, it has the influence of *flattening* all such notes as happen to be on that line or space through the whole strain; unless regulated by the intervention of sharps, or naturals, which answer only for those notes where those naturals or sharps are placed, and respect the tone of those notes only, but do not alter their names.

4. A Sharp ♯ is a mark of *Elevation*, just the reverse of the flat, and raises all the notes before which it is placed, *half a tone higher*: If set at the beginning of a staff, it sharpens, or rises every note on that line or space throughout the strain, except contradicted by flats or naturals.

5. A Natural ♮ is a mark of *Restoration*, which being set before any note, that was made flat, or sharp, at the beginning of a staff, restores it to its former natural tone, as for example,  Here you may see that B is made flat at the beginning of the staff, but the note which stands on B must be sung as if there had been no flat there, because it is restored by the *Natural* placed before it.

6. A Slur or Tie, links any number of notes together which should be sung to *one syllable*,* as for example, 

7. A *Direct*, ¶ is placed only at the end of lines, to direct the performer to the place of the first note, in the next line.

8. A Bar, | is used to divide the musick according to the measure note, into equal parts.

9. A Double Bar, || shews the end of a strain, and in modern musick, is commonly preceded by a *Repeat*.

10. A Repeat :: shews that a part of the tune is to be sung *twice*, beginning the second time of singing, at the note over which it is placed, and ending at the next *Double Bar*, or *Close*: Therefore having sung that part once you must immediately sing it again.

11. A Shake, tr. or Trill, is, or ought to be placed over any note that is, or ought to be shaken; something like the following:

 This is called one of the graces in musick; but unless it is well done, it had better be unattempted by the performer, and sung plain. Notes may sometimes be *graced*, but not *disgraced*. Observe that a note cannot be shaken without breaking of it to pieces; as in the example: See the minim marked with a tr. and the example how to perform it.

12. A

* In singing slurred notes in words, great care should be taken to pronounce the words properly, for which purpose observe these directions: Keep your lips and teeth asunder from the beginning to the end of the slur, warble the notes in your throat, sliding easily from one sound to another, without any kind of hitch or jolt, (which is too often practised) and if possible do not stop to take breath until you have done; otherwise you break the slur and spoil the pronunciation.

12. A *Double Ending*, shewn by the figures 1 2 set over notes at the close of a tune, when there is a repeat, thus,

1st: First Example. 1 2

1st: Second Ex. 1 2

13. Such notes as have *Marks of Distinction* placed over or under them, thus, 

should be sounded very distinct, and with some emphasis.

14. A *Cloze*,  is two, three, or four bars together, which shew the tune to be ended.

Of the various MOODS of TIME used in PSALMODY.

NINE different Moods of Time are now used in Psalmody, four of which are called *Common Time*, viz. *Adagio*, *Largo*, *Allegro*, and *2, 4*, or *2 Fours*, and are thus characterized at the beginning of tunes or strains, viz.

These four are called common time, because they are measured by even numbers, as 2, 4, 8, &c. *Adagio* denotes a very slow movement: It has a semibreve for its measure note; every bar containing that or other notes or rests amounting to the same quantity of time; so in the example following, a semibreve fills the first bar; the second bar is filled

by four crotchets; the third bar by a semibreve rest. In order to give these notes and rests their proper regular time, a motion of the hand is necessary, which is called *Beating of Time*; every motion, or swing of the hand, is called a *Beat*. This mood has four beats in a bar, which should be beaten two down, and two up, in the following manner,

First, lightly strike the ends of your fingers: Secondly, the heel of your hand: Thirdly, raise your hand a little, and shut it partly up: Fourthly, raise it still higher, and throw it open at the same time; which completes the bar. It is best to distinguish the third motion from the fourth, by shutting or opening the hand. Every bar in this mood of time is performed in the like manner. Each beat should be exactly one second of time.

Largo

Largo, the *second* mood in common time, has likewise a *semibreve* for its measure note, and contains notes or rests to that amount, in each bar. This also has *four* beats to a bar, performed in the same manner as in *Adagio*, only one quarter quicker, or *four* beats in the time of *three* seconds.

Largo. 1, 2, 3, 4. 1, 2, 3, 4. 1, 2, 3, 4.

d. d. u. u. d. d. u. u. d. d. u. u.

Where the musick, in *Largo*, consists chiefly of minims, sometimes but *two* beats are given to a bar.

1, 2, 1, 2.

d. u. d. u.

Allegro, the *third* common time mood, has also a *semibreve* for its measure note, and contains notes or rests to that amount, in each bar; but has only two beats to a bar, which are *one* down, and *one* up, allowing one second to each beat, as in this example, viz.

Allegro. 1, 2. 1, 2. 1, 2.

d. u. d. u. d. u.

The *fourth* common time mood, 2, 4, or 2 *fours*, has a *minim* for its measure note, and notes or rests to that amount in each bar; it has also *two* beats to a bar, *one* down, and *one* up. *Four* beats in this time, are performed as quick as *three* in *Largo*, when four beats are given to that mood of time. (See note at the bottom of page 3d.)

1, 2. 1, 2. 1, 2.

d. u. d. u. d. u.

The next moods of time in order, are called *Triple Time* moods, of which there are *three*, viz. 3 *Twos*; 3 *Fours*; and 3 *Eights*. They are called *Triple* because they are measured by odd numbers, each bar containing either *three* minims, *three* crotchets, or *three* quavers; *two* of which must be sung with the hand down, and *one* up. The marks of triple time are thus set at the beginning of staves,

The *first*, 3 *Twos*, contains *three* minims, or *one* pointed semibreve, or other notes which measure equal to them, in a bar; which are sung in the time of *three* seconds, *two* beats down, and *one* up, as for example,

1st. Triple Time. 1, 2, 3. 1, 2, 3. 1, 2, 3.

d. d. u. d. d. u. d. d. u.

N. B. A minim in 3 *Twos* is performed in the same time as a crotchet in the first mood of common time.

The *second* mood of triple time, 3 *Fours*, contains *three* crotchets, or other notes or rests equivalent, in a bar, which has *three* beats, *two* down, and the other up, one half quicker than the first triple time mood: A crotchet in this time is equal to a crotchet in the second mood of common time.

2d. Triple Time. 1, 2, 3. 1, 2, 3. 1, 2, 3.

Example.

d. d. u. d. d. u. d. d. u.

The *third* triple time mood, has *three* quavers, or one pointed crotchet, or other notes, or rests, equivalent, in a bar; has also *three* beats to a bar, but they are performed twice to one as quick as in the mood last mentioned.

3d. Triple Time. 1, 2, 3. 1, 2, 3. 1, 2, 3.

d. d. u. d. d. u. d. d. u.

The two remaining moods are called *Compound Moods*; being compounded of common and triple measure; of common, as the bar is divided equally, the fall being equal to the rise, and of triple, as each half of the bar is threefold.

The two compound moods are distinguished, at the beginning of staves, thus,

The first, 6 Fours, contains six crotchets in a bar, or other notes or rests equivalent, which are sung in the time of two seconds, and by two equal beats, one down and one up, as in the example following:

The second compound mood, contains six quavers in a bar; has also two beats to a bar, one down and one up. A beat in this mood has the same time as the second in common time, called *Largo*.*

* Mr. Reed, in treating of the several moods of time, writes as follows: "The figures in the examples placed over the bars shew the number of beats in each bar, and the letters placed under the bars shew how they must be beat, viz. the letter *d* shews when the hand must go down, and the letter *u*, when it must rise up.

The bar rest is properly so called, because it is allowed to fill a bar in all modes of time.

Observe here, — That the hand falls at the beginning, and rises at the end of every bar in all moods of time.

That in the Adagio and Largo moods a semibreve is four beats, a minim two, a crotchet one, a quaver half, &c.

That in the Allegro and 3, 2, moods a semibreve is two beats, a minim one, a crotchet half, &c.

That in the 2, 4; 3, 4; 3, 8, and 6, 8, moods, a semibreve cannot be used, because that it will more than fill a bar.

That in 2, 4, and 3, 4, a minim is two beats, a crotchet one, and a quaver half, &c.

That in 3, 8, where a minim cannot be used, a crotchet is two beats, a quaver one, &c.

That in 6, 4, a pointed minim is one beat, crotchets three at a beat, &c.

That in 6, 8, a pointed crotchet is one beat, quavers three at a beat, &c.

Observe also, — That in those moods of time which are not marked with figures, a semibreve fills a bar; but in all those moods which are marked with figures, the upper figure expresses a certain number of notes of some kind which fill a bar, and the under figure shews how many of that kind of notes are equal to a semibreve; so in the mood marked $\frac{3}{2}$, the upper figure being 3, shews that three notes of some kind will fill a bar in that mood, and the under figure 2, shews that two of them are equal to a semibreve; now two minims are equal to a semibreve, therefore three minims fill a bar in that mood of time. The same rule holds good with regard to the other moods marked with figures.

The performing the several moods in their proper time, is a matter which should be well attended to: And yet singers often fail in this point. That some moods are quicker and some slower, all agree, yet some will sing every mood alike, or so nearly alike that the difference is scarcely perceptible. This, in many pieces, especially in such as change from one mood to another, entirely frustrates the design of the composer, and ruins the music. Others again will sing all moods

Of the BRACE.

THE several parts of a piece of musick, which are sung together, are shewn by a *Brace*, placed at the beginning of the staves, as in the example. If *two* parts only are sung together, the brace, or *two* perpendicular lines, enclose the two staves; and if three parts are sung together, then the brace is extended to enclose *three*, and so of *four*.

Of CHUSING NOTES.

NOTES are often set immediately over each other in the same staff and bar, only *one* of which is to be sounded by the same person; the finger may sound which of them he pleases: If two persons are singing the same part, one of them may take the *upper* note, and the other the *lower* note.

Example of chusing Notes.

Notes

moods too slow: This is so common that many persons who profess to be good fingers will scarcely allow it to be an error. It is generally most prevalent in those companies where the spirit of musick is upon the decline, and the fingers grown dull and indifferent about singing; they will then drag on heavily through a piece of musick, and render it not only a burden to themselves, but disagreeable to all who hear them. On the other hand, some may err by beating time too fast; this error is sometimes found in persons who are possessors of too great a share of ostentation. To enable young fingers and young teachers of musick to avoid all these errors, and to give each mood its proper time, I have added the following directions:

Take a leaden ball, the size whereof is immaterial; about an inch in diameter is as well as any: Suspend it by a small tight cord in such a manner as that it may swing each way without interruption, and for the several moods of time, let the length of the cord from the center of the ball to the pin or nail from which it is suspended be as follows:

For the Adagio, Allegro, 3, 2 and 6, 4 moods, $39\frac{2}{10}$ Inches.

For the Largo, 3, 4 and 6, 8 moods, $22\frac{1}{2}$ —

For 2, 4 — $12\frac{1}{8}$ —

For 3, 8 — $5\frac{1}{2}$ —

Then for every swing or vibration of the ball, i. e. every time that it crosses the perpendicular line, or place of its natural situation when at rest, count one beat, and for the different moods of time according to the different lengths of the cord as expressed above. This is so easy a way of ascertaining the true time for each mood, it is presumed no one who designs to be a singer will think it too much trouble to make trial of it.

These

Notes set an *eighth* below the *common Bass*, are called *Ground Bass*. Rests are often placed over each other, but the time of *both* is to be reckoned.

Of the several CONCORDS and DISCORDS, both perfect and imperfect. From Tansur's Royal Mel.

THERE are but four *Concords*, in music, viz. the *Unison*, *Third*, *Fifth*, and *Sixth*; (their *Eights* or *Octaves* are also meant.) The *Unison* is called a *perfect cord*; and commonly the *Fifth* is so called; but the *Fifth* may be made *imperfect*, if the composer pleases. — The *Third*, and *Sixth*, are called *imperfect*; their *cords* not being so full, nor so sweet as the *perfect*: But in four parts, the *Sixth* is often used instead of the *Fifth*, in some certain places, when the *Fifth* is left out; so in effect, there are but three *concords*, employed together, in composition.

N. B. The meaning of the word *Imperfect*, signifies, that it wants a *semitone* of its *perfection*, to what it does when it is perfect; for, as the *lesser*, or *imperfect Third*, includes but three *half tones*; the *greater* or *major Third*, includes four *half tones*, &c.

The *Discords*, are a *Second*, a *Fourth*, and a *Seventh*, and their *Octaves*; though sometimes the *greater Fourth* comes very near to the sound of an *imperfect cord*, it being the same in ratio as the *minor Fifth*. But I will set you

An Example of the several CONCORDS and DISCORDS, with their OCTAVES under them.

Their Octaves, or Eights—

N. B. That if a *voice*, or *instrument*, could reach to ten thousand *Octaves*, they are all counted as one, in nature.

Every *Eighth*, or *Octave*, contains *twelve* semitones, the *five* whole tones being divided into *semitones*, and the two *natural* semitones, make the twelve. See the example in the next page.

An

These moods are however, sometimes varied from their true time, by arbitrary words, such as *quick*, *slow*, &c. being placed over the tune or anthem, in which case no certain rules can be given: The following general directions however may not be amiss.

When the term *slow* occurs, let the music be performed about one sixth slower than the true time, and when the term *very slow* occurs, about as much slower still, and contrary for terms *quick* and *very quick*.

An OCTAVE contains 12
Semitones.

G	8 th	12
f* or g b	* 7 th	11
F	b 7 th	10
E	* 6 th	9
e b or d *	b 6 th	8
D	5 th	7
c * or d b	* 4 th	6
C	4 th	5
B	* 3 ^d	4
b b or a *	b 3 ^d	3
A	* 2 ^d	2
g * or a b	b 2 ^d	1
G	unison.	0

In this scale of *Semitones*, the lower line G is made the foundation from which the others are reckoned, and is therefore called a *Unison*, because one and the same sound is a unison. The right hand column of figures shews the number of semitones between G at the bottom and each of the other letters, both in their natural situation, and when made flat or sharp. Next above G you will find G sharp, or A flat, which is called a flat second, containing but one semitone; the next is A, which is a sharp second, containing two semitones; the next is B flat, or A sharp, which is a flat third, containing three semitones; the next is B, which is a sharp third, containing four semitones; the next is C, which is a fourth, containing five semitones, &c. &c. The flat second, third, sixth and seventh, are called lesser seconds, thirds, &c. and the sharp second, third, fourth, sixth and seventh, are called greater seconds, thirds, &c. which is the common distinction, and the greater always contains a semitone more than the lesser.

Of the KEYS used in Musick.

IN Musick there are only two *natural*, or primitive Keys; one of which is cheerful, and called *sharp*; the other melancholy, and called *flat*. C is called the sharp key, and A the flat key. Without the aid of flats and sharps placed at the beginning of staves, no tune can rightly be formed on any other than *natural* keys. Flats and sharps placed at the beginning of staves transpose B-me, the centre and master note, together with all the rest in their order, and by forming what are called *artificial keys*, bring the same effect as the two natural keys. The reason why the two natural keys are transposed by flats and sharps at the beginning of the staves, is, to bring them within the compass of the voice. The last note in the Bass is the *key note*, and is immediately *above*, or *below me*; if above, it is a sharp key; and if below, it is a flat key; or in plainer terms—all tunes are either on a *sharp* or a *flat* key; if the last note of the Bass, or *key note* is named *fâ*, then it is a sharp key; but if it is named *là* then it is a flat key. The *key note* can never properly be *me*, or *sol*. The reason why one tune is on a sharp, lively key, and another on a flat, melancholy one, is that every third, sixth and seventh, in the sharp key, is half a tone higher than in the flat key. See the following example of the two keys.

Of

Of LEADING NOTES.

THE Appoggiatura, or leading note, serves for the arriving more gracefully to the following note, either rising or falling, and must be dwelt on according to the length of the note it is made of; sometimes it is used as a preparation to a trill, and is expressed by an intermediate note, or notes: As for example.

N. B. Observe the *little notes* are not reckoned in time, and are only to be softly touched, or sounded.

Of TRANSITION.

MR. REED has written so concisely on Transition, that it seems best to give his own words and example, which are as follow, viz.

“ The *little notes* slurred to the minims must not be considered as adding any thing to the time, the bars being full without them, but only as notes to lead the voice from one sound to another, and if sounded at all, must be sounded as much softer than the minims as they are smaller. Transition is nothing but sliding gracefully from one note to another : But fingers should be exceedingly careful to deviate as little as possible from the true sound of a note, because in going off from the true sound they will undoubtedly make discords where the composer did not design to have any, and then perhaps the composition will be despised, because the performers are faulty.

"N. B. Transition, as well as trills, had better be omitted than badly performed."

Of SYNCOPATION.

NOTES of Syncopation are those which are driven out of their proper order in the bar, or driven through it, and require the hand to be taken up or put down, while such notes are sounding. One or two examples follow, which, with the help of the master, will soon be understood by the young fingers of tolerable capacities.

Examples

Examples of *Synapton*.

The Learner may sing the Notes as they stand in the following Stave.

Great care must be taken to give every note its true and distinct sound, and to observe the semitones between *me* and *fà*, and *là* and *fà*, in ascending; and also between *fà* and *là*, and *fà* and *me*, descending. After having learned to sound the following notes well, they may begin to practice on plain and easy musick.

C O N C L U S I O N.

THIS part of the work will be concluded with some observations on singing and general directions to learners, extracted from the American Singing Book, which are as follows, *viz.*

"When a tune is well learnt by note it may be sung in words, and every word should not only be pronounced according to the best rules of grammar, but spoken plain and distinct: Singers often fail in this point, by which means half the beauty of the musick is lost, the words not being understood.

"Notwithstanding all that has been or can be said with regard to graces, the best way is to sing with ease and freedom, and without confining yourself to any certain rules for gracing musick, any further than can be adapted in a natural and easy manner, there being nothing forced or unnatural in good musick.—Every singer should sing that part which is most suitable to his voice, in which case learners should submit to the judgment of the master. Care should be taken, in singing companies, to have the parts properly proportioned; one half the strength of the voices should be upon the bass, the other half divided upon the other parts.—A solo should generally be sung softer, and a chorus which follows a solo, louder than the rest of the musick. When the words *soft*, *loud*, &c. are placed over the musick, some regard should be paid to them. When words are repeated in musick, the strength of the voices should increase every time they are repeated, and when the musick is repeated it may be well to sing it louder the second time than the first. Low notes in the bass should generally be sounded full, and the high notes in any part, not full, but clear. In singing musick the strength of the voices should increase as the parts fall in, and the pronunciation in such cases should be very distinct and emphatick."

Detailed description: This is a musical score for a song titled "The Voice of my Beloved." The page number is 88. The music is written in 2/4 time, indicated by the '2' over the '4' in the time signature. The key signature has one sharp (F#), indicated by a '*' symbol. The score consists of a vocal line (treble clef) and a piano accompaniment (bass clef). The lyrics are written below the vocal line. The first system of music includes the lyrics "The voice of my be---lo---v-ed sounds, While o'---er the mountain tops he bounds, He flies ex-". The second system includes "ult---ing o'er the hills, And all my soul with trans-port fills. The voice of my be---lov---ed". The music features various musical notations such as eighth notes, sixteenth notes, and rests, with some notes marked with an asterisk (*). There are also dynamic markings like 'tr.' (trill) and 'w' (weak or breath mark).

Time shall soon this earth re - - - move.

Rise my soul, and haste a - - way To seats pre - - par'd a - - - bove.

Loud.

Rise my soul, and haste a - - way To seats pre - - par'd a - - - bove.

Rivers to the ocean run,
Nor stay in all their course,
Fire ascending seeks the sun,
Both speed them to their source.
So a soul, that's born of God,
Pants to view his glorious face,
Upwards tends to his abode,
To rest in his embrace.

Cease, ye pilgrims, cease to mourn,
Press onward to the prize;
Soon our Saviour will return,
Triumphant in the skies.
Yet a season, and you know,
Happy entrance will be given,
All our sorrows left below,
And earth exchange'd for heav'n.

Lord what a tho'tless wretch was I, To mourn and murmur and re-pine, To see the wicked plac'd on high, In pride and robes of honour shine.

But

But, O their end, their

Bangor. S. M.

Why do we mourn de - parting friends, Or shake at Death's alarms? 'Tis but the voice that Je - sus sends, To call us to his arms.

The first system of the musical score consists of three staves. The top staff is in treble clef with a key signature of one flat (F) and a time signature of 6/8. The middle and bottom staves are in bass clef with the same key signature and time signature. The lyrics are written below the staves, with some words like 'S:' and '7' appearing above certain notes.

The hill of Si - on yields A thousand sacred sweets, Be--fore we reach the heav'nly road, Or walk the golden streets,

Then

The second system of the musical score consists of three staves, continuing the melody from the first system. The notation and key signature remain consistent. The lyrics continue across the staves.

Then let our songs a - - bound, And ev'ry tear be dry; We're march-ing thro' Im - man-uel's ground, To

The musical score consists of two systems of staves. The first system has four staves, with the second staff containing the lyrics. The second system also has four staves, with the second staff containing the lyrics. The music is written in a historical style, likely for a choir or a group of voices, with various note values and rests. The lyrics are written in a cursive script, and the overall appearance is that of an old manuscript.

Moderato.

The first system of musical notation consists of three staves. The top staff is in G major (one sharp) and 4/4 time, starting with a treble clef and a key signature of one sharp (F#). The middle staff is in G major and 4/4 time, starting with a treble clef and a key signature of one sharp (F#). The bottom staff is in G major and 4/4 time, starting with a bass clef and a key signature of one sharp (F#). The lyrics are: "Earth has de - tain'd me pris'ner long, And I'm grown wea-ry now ? My heart, my hand, my

The second system of musical notation consists of three staves. The top staff is in G major and 4/4 time, starting with a treble clef and a key signature of one sharp (F#). The middle staff is in G major and 4/4 time, starting with a treble clef and a key signature of one sharp (F#). The bottom staff is in G major and 4/4 time, starting with a bass clef and a key signature of one sharp (F#). The lyrics are: "ear, my tongue, There's noth---ing here for you, There's nothing, noth - - ing here for you."

Jerusalem. L. M.

The first system of the musical score consists of two staves. The top staff is in treble clef with a common time signature (C). The bottom staff is in bass clef with a common time signature (C). Both staves have a key signature of one sharp (F#). The music is written in a simple, melodic style with many eighth and sixteenth notes.

This life's a dream, an emp - ty show, But the bright world to which I go, Hath joys sub - - stan - - tial and fir -

The second system of the musical score consists of two staves. The top staff is in treble clef with a common time signature (C). The bottom staff is in bass clef with a common time signature (C). Both staves have a key signature of one sharp (F#). The music continues from the first system, with some triplets indicated by a '3' over a group of notes.

S: Con. Spirito.

The third system of the musical score consists of two staves. The top staff is in treble clef with a common time signature (C). The bottom staff is in bass clef with a common time signature (C). Both staves have a key signature of one sharp (F#). The music continues from the second system, with a change in tempo or mood indicated by the 'Con. Spirito' marking.
