## ADVERTISEMENT.

THE publick is now offered another edition of the Village Mammony, with confidence that if will be found still increasing in its claims upon their patronage. Those alterations have been made which correspond to the progressive improvement of the publick taste in Sacred Musick. Classical European tunes have been substituted for some of a less perfect character, and the valuable foreign musick which is retained, and which the publick has not ceased to venerate and admire, is still preserved in this collection; secure fiom the touch of American innovation. In some instances it has been revised and corrected from geraine and unadulterated European copies.

Much gratitude is felt hy all interested in the success of this book, for the liberal patronage which has been extended to it. Should any of its patrons regret that it has not hitherto excluded all tunes which are not universally considered classical, they are reminded that it circulates over portions of our country, where refinement of taste and opportunities for improvement are necessarily unequal, and the Vhatae Harmony by grudually increasing its number of genuine and perfect tunes, has adopted the most effectual, and indeed only practicable method of raising the popular taste to an high and equal standard. This fact certainly entitles the book to the continued patronage of those who have desired a general improvement. But the Village Harmony has now become secure from the charge of a deficiency in classical pieces, and has added much to its clams upon the support of those who regard the high and solemm purpose of si. cred Musick.

## INTRODUCTION TO THE GROUNDS OF MUSICK.

MUSICK combines melody, air, harmony, and measure. Meloly is a series of simple sounds. Air is the spirit and style of melody. Ha;ma$n y$ is the cononance of two or more sounds, cither naturai or art:ficial. Natural SIarmony is produced by the common chord. Artificial Ifarmony is a mixture of concords and discords, bealing relation to the common chord-

## THE DIATONIC OR NATURAL SCALE OF MUSICK.

The notes of the diatonic or natural scalc of musick are scven, whose distances or degrecs are moasured by tones and semi or half tones. The seven first letters of the alphabet are applied to the notes, in the following order-A, B, C, D, E, F, G; wnenthere is occasionfor an cighth letter, the first is repeated. Thesc letters comprehend a system of dicgrees, called an octave, from which procecds the varicty of harmony,

THE GAIUT OR SCALE OF MIUSICK.

## MUSICAL CHARACTERS EXPLANED.

The Counter Cliff is placed on the third line, and called the C Cliff, and is used in Counter.

A Staff is five lines with their spaces, whercon notes and other characters are written.

Ledger lines are used when noies ascend or - lescend beyond the compass of the staff.

A Brace shows how many parts are sung togther.

A Shar/2 sct before a note raises it one semitone.

A Flat set before a note sinks it one semitone.

Either a Sharfz or flat set at the beginning of a tune has influcnce through it, unless contradicted by a natural.

A Nutural restores a note, made flat or sharp to its primitive sound.

Observe, that Sharps, Flaţs, and Naturals affect the sound of no letters but those on which they are set.

A Repeat shows what part of a tune is to be sung over again.

Figures 1,2 , signify that the note under fig. tre 1 is to be sung before repeating, and the note under figure 2 at repeating; if ticd, both re to be sung.

A slur shows what notes are sung to one sylla ble: but when the no!es are tied at the bottom, the slur is umeeessary.

Stoccato Marks should be performed distinet$1 y$; when dots are introduced, they must be suns soft and distinct.

A Point of Adcitition adkls to a note one half its original lengih. When set afier a Semibreve, it makes it equal to three Minims; when set af-
 ter a Minim, it makes it cqual to three Crotchets, ©ie.

A Hold signifies that the notes, over which it is set, may be continued at the pleasure of the performer.

A Figure 3, placed over or under any three notes, reduces them to the time of two of the same kind.

Choosing Notes are placed in a direct line one above another, cither of which, or both may be sung.

A Ligature or Tie, eomprehends two or more notes upon the same line, or space, iticd with a slur, which niust be sung with one name, and as one sound.

A Single Bar divides the time aecording to the measure noie.

## INTRODUCTION.

A Measure Note is that which fills a bar.

Alitoggiatures, or Leaning Notes, are sung according to the value of the note, which follows.

A Double Bar shows the end of a strain.

A Close shows the end of a tune.

## OF NOTES.

SIX Notes aro used in vocal musick, which are of different forms and lengths, viz.

1st. The Semibreve . . . . . $\overline{\bar{D}}$.which contains 2 Minims
2d. The Minim........

4th. The Quaver

5th. The Semiquaver

$E$
6th. The Demisemiquaver, which is the shortest note used.

## OF RESTS.

RESTS require the same time as the notes they represent.

## INTRODUCTION.

SCALE SHOWING THE PROPORTION OF NOTES.

The above scale ougit to be well understood, otherwise the Learner will continually be at loss.

OF THME
THERE are threc disisions of Time, viz. Common, Tripple, and Compuand.

COMMON TME is measured by even numbers, as, 2,4, \&c. and has four Marks.

The First Mark has a Semibreve for its measure note, and is petformed in fou: seconds; accented on the first and third part of the bar, and thus beaten;

1st. Let the ends of the fingers fall,
2d Let the heel of the hand fall,
St. Raise the heel of the hand,
4 th. Raise the ends of the fingers, which completes the bar

The Second Mark $\overline{\frac{5}{5}}$ has a Semibreve for its measure note, and is performed one 4 th faster ; accented ald beaten as in the first.
Example.

The Third Mark or has a Semibreve for its measure note and is performed in ㄹ 㘴 iwo seconds; accented on the first part of the bar, and is beaten thus
ist. Let the ends of the fingers fall,
2d. Raise the ends of the fingers, which completes the bar.

The Fourth Mark $\overline{\underline{z}}$ has a Minim for its measure note, and is performed one 4 th faster 4 than the third; also accented and beaten as in the preceding Mark.

Note. The Firśt Mark has 4 beats in a bar.
The Second Mark has 4 beats in a bar. The Third Mark has 2 beats in a bar. The Fourth Mark has 2 beats in a bar.

TRIPLE TIME is measured by odd numbers, as 3, \&c. and hás three Marks, which are all beaten in the same manner, thus,

1st. Let the ends of the fingers fall,
2d. Let the heel of the hand fall,
3d. Raise the ends of the fingers, which completes the bar:

The First Mark $\frac{7}{7}$
called three to two, has a pointed Semibreve for its measure note. 2్ Three Minims fill a bar, on six Crotchets, \&ec. ascented on the first, and faintly on the third parts of the bar; each Minim to be sounded in a second of time.

## Examples.

 for its measure note. $I$ Three Crotchets, or six Quavers fill a bar, accented as in the first Mark, and performed one 4th faster.

The Third Mark $\frac{\overline{3}}{\mathbf{3}}$ called threefrom eight, has a pointed Crotchet forits measure note. 是 Three Quavers, or six Semiquavers fill a bar; accented as in the first Mark, and performed about one quarter faster than the second.

## COMFOUND TIME has two marks.

The First Mark G called six to four, has either two pointed Minims, two Minims 4 and two Croichets, or six Cro!chets in a bar; three sung with the hand down, and three with it up in the time of :wo seconds, accented on the first and third part.

The Second Mark $\overline{\text { E}}$ called six from eight, has cither two pointed Crotchets, two 査 Crotchets and two Quavers, or six Quaverg in a bar; two beats, one down and one up, and petformed one sih fasser. Arcented as before.

## 

The figures refer to the namber of beats in a bar; the letters $d$ and $u$, for down and up beats.

Note. Suered Musick, under the tivo preceding Marks, should never be sung in a rapid manner, for that destroys all solemnity, and is absolutely inconsistent with that kind of niovement required when set to sacred subjects. The mathematical difference between the foregoing Marks of Time, is here omitted. The perforning of Musick siower or faster, in the different Marki, is left to directive terms, in seneral use, and to the judgment of the performer.

OF'THE HLODES, OR KEYS.
THERE are but two Modes or Keys, the Major, or Sharp Key, and Minor, or Flat Key.
The learner may distinguish the Modes by the last note in the Bass which note, if it be Faw, is the Major Morle, and if it be Law, it is the Minor.

The principles of the two Modes must be explained by an Instructor.

## OF NAMING THE NOTES.

WHEN a tune has neither Sharps nor Flats at the beginning, Mi is in B.
If there be 1 Sharp, Mi is in $F$. \} If there be 1 Flat, Mi is in $E$. 2 Sharps, Mi is in C. s Sharps, Mii is in G. - . . 2 Flats, Mi is in A. 4 Sharps, Mi is in D.

$$
3 \text { Flats, Mi is in } \mathrm{D} \text {. }
$$

4 Flats, Mi is in G.
Above Mi are faw, sol, law, faw, sol, law, and then comes Mi.
Below Mi are law, sol, faw, law, sol, faw, and then comes Mi-
Between Mi and Fa -and Law and Faw, there is but a semitone; between the rest are whole tones.

Passages, in which occasional Sharps and Flats frequently uccur, and which it is not easy to learn by the common rule of sol-fa-ing, are rendered less difficult by inverting the names of all the notes towards the cadeace, which they are producing, and calling them as in the natural key; i. e. when faze by sharps is raised a semitone for two or threc bars together, call it mi, and the notes above and below accordirgly; so when $m i$ is a semitone lower by flats, call it $f a w$, and the notes above and below it, as if it really were so. This way of inverting the notes will give the true sound of those difficult places, in the easy way of common sol-fa-ing.

## INTRODUCTION.

The learner ought to commit most of the preceding rules to memory, before he attempts to call the notes; a neglect of this is one of the principal causes of the inaccurate performance, which at present exists in many choirs of singers. Many persons, having a good musical ear, are very apt to trust to that, rather than confine themselves to rules, and afterwards blame their instructors for their nom negligence. Instructors ought to insist that their pepils pay a particular attention to the principles, and in no case to suffer them to neglect them.
When the learner has acquired a ready acquaintance with the rules, he ought to attend to the Lessons for Tuning the Voice, on which depends his future progress, and he ought not to attempt a tune till he can sound the several intervals in the octave readily.
Many schools have begun upon tunes, when they could scarccly have given a letter upon the scale, which is another cause that there are so many balf singers. Thelearner may be sure that the more thoroughly he understands the principles, when he ought to attend to them, the more $s$ wift will be his progress afterward.

Schools then ought to be solicitous that their instructors be weil qualified, for how can they instruct others when they are ignorant themselves? Learners, in that case, are led to suppose that they fave improved, when they really have not, and consequently their time and money are both spent to no manner of purpose.

## GENERAL OBSERVATIONS

When a tune is well learnt by note, it may be sung in words. P:onounce every word as distinctly as possible. Singers generally fail in this point, by which means half the beauty of the musick is lost, the words not being understood.

In assigning voices to the several parts, the Teacher must be the judge. For if a roice which is suitable oniy for Bass, be put upon the Tcnor, it will hang as a weight upon that part, and have a tendency continually to lower the pitch.

Never sing through the nose, fur that will spoil the voice, make the musick disagreeable, and have a disgusting effect upon the hearer.
High notes should generally be sung softer than the low. The subject ought however to recrulate the strength of the voice. The tone of the Eass should be full and majestic; of the Tenor, bold and manly; of the Combter, soft, $y$ ct firm ; of the Treble, smonth and! delicate. Suitable attenion should always be paid to the direcive ternis. A good tune performed withont any variation, will be dull and insipid. In a company of singers it would have a good effict for some of the performers, on each part, to be silent, when passages marked Soft occur ; the additional streagth of thei: voices in the Loud, which generally succeeds the Suft, would mark the contrast more strongly, and give peculiar force and energy to the performance.-A becoming manner of conduct in a c-icction of singers, will greatly increase the agrceable sensations, which naturally arise from good performances.

The graces and ornaments of musick, such as Holcts, Zrilis. Afthog giatures, Transitions, Ecc. must be acquired by great practice and attention; the learner had better omit them, till his knowledge and judgment dictate when and where to apply them.

PASSAGES, where Syncopation takes place, arc better explained by the Instructor, than by words; for this reason, an explanation is here omitted.

## LESSONS FOR TCNING THE VOICE.

WHEN learning the following lessons for tuning the voice, be careful to give every note its proper sound, and pay particular attention to the situation of the Semitones. Wet the motion of the hand, in keeping the time, be cven and exact; alwiys rememicring that the hand must fall at the beginning of a bar, and rise at the close.

The more time you allow for the practice of the lessons, the casier you will learn a tune afterward. Should you neglect them wholly, you cannot read musick hereafter with any frmiess and certainty of tone.
